

Starting date: **1st October, 2024**

Project duration: **48 months**

EU contribution: **€ 11.166.415,71**
(Research and Innovation Action)

Number of participants: **12**

Coordinator: **EU CORE Consulting S.r.l.**

**Biomass to bio/E-methanol by Breakthrough
SOEC-based Process: the BeBOP innovation**

Funded by
the European Union

“BeBOP will demonstrate at TRL6 the production of sustainable methanol from residual biomass by integrating a Solid Oxide Electrolysis Cell (SOEC) and a methanol reactor into an existing gasification plant at VTT in Finland. The project combines renewable electricity and biomass for a flexible, circular and replicable bio-/e-methanol system”.
